## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-14 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art does not teach in combination with or reasonably suggest the other limitations of claim 1 the first end surface of the body portion having a circumferential recess formed in a radial outer portion thereof so as to create a leak path for communicating fluid from the discharge arc region to the inlet arc region when the cam member is in a start-up position and an undervane portion of a vane element is positioned radially outward of a radially inner edge of the recess formed in the first end surface when such vane is positioned in the seal arc region of the pumping cavity." Also, the prior art does not teach in combination with or reasonably suggest the other limitations of claim 8 the first end surface of the body portion having a circumferential recess formed therein and extending between each vane slot, wherein the circumferential recess is adapted and configured to provide a path for high pressure fluid to leak from the discharge arc region to the inlet arc region of the pumping cavity when each vane tip surface has worn such that the undervane portion is positioned radially outward of a radially inner edge of the recess.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
